Luminet Wireless Pro

Rise Above It with London's Network in the Sky

Luminet helps businesses embrace the fast, busy, thriving side of London and the opportunities it presents by providing excellent connectivity.

- Provides speeds of up to 5Gbps (upload and download)
- Quick to install (10 days, but can be expedited)
- Latency of sub 5ms
- Faster than fibre (lower latency)

- Range of up to 15km
- 99.95% SLA
- Flexible and scalable to deliver the bandwidth and latency required when it's required
- Resilient and truly diverse connection

- Military grade encryption unlike any other connectivity
- Symmetrical upload and download speeds, guaranteed uncontended connectivity
- Capable of prioritising delivery of the most important applications and services

- Industry leading London based support team, providing 24/7/365 support

Luminet Wireless Pro can be used for...

- Primary or backup connection
- Alternative to fibre
- Short term connectivity requirement
- Mission critical internet connection
- Where low latency is crucial for business
