Luminet®

Managed Firewall

Services

Introduction

Luminet's Managed Firewall service is a robust and scalable fully managed service for small to enterprise customers and is installed in 10 working days.

Firewall as a service is centralised and hosted inside our Private Cloud Tier 3 Data Centres and lowers the total cost of ownership with no hardware purchase or maintenance costs. Firewall as a service also has the benefits of reducing risk and increasing uptime.

The Managed Firewall service can be tailored depending on your individual business requirements.
