Luminet®

Luminet Wireless Pro

Service

Introduction

Our **Luminet Wireless Pro** service is 5Gbps Ultra Highspeed Clear Channel Internet, is delivered over the air and can be installed in 10 working days, with the install works usually completed in 8 hours, excluding any extra in-house works if individual units in a building need to be connected.

This service is ideal for customers with a demand for ultra-high throughput or sites with multiple units (offices, flats etc.) offering high speed internet access to multiple customers in the building with aggregate throughput of up to 5 Gbps speeds.

It is also ideal to replace leased line wired services or serve those customers who cannot be served with a leased line wired service, require a quick installation, truly diverse primary or backup connection or have a temporary need such as an event or wayleave issues.

Luminet Wireless Pro is for dedicated Internet access or for multi- site networking whether virtual or physical and can be delivered as MPLS or VPLS or QnQ.

Our core networks have had 100% uptime over the last 9 years, because of our fully mirrored, redundant and diverse hardware and software, providing carrier class connectivity for some of the world's biggest brands and heaviest data users. Our network is built so that customers have the shortest distance to the internet with no more than 2 hops to ensure very low latency.

Connectivity

- Wireless 5Gbps
- Symmetrical
- Dedicated bandwidth
- Ethernet handoff
- Low latency
- AES encrypted security
- Cisco hardware

Delivery, Support and Monitoring

- Provisioned within 10 working days (Expedited on request)
- Fully managed Service end to end
- 24/7/365 Network Operations Centre (NOC)

Service Level Agreements

- Luminet Wireless Pro 99.95%
- 4 hour hardware replacement
